Farm Tractor

Print it

1. Print every page at 100% / "Actual size" (no "fit to page"). 12 pages on A3.
2. Check the 50 mm square measures exactly 50 mm.
3. Tape the pages together using the corner marks (page order is printed on each page).

Build it

1. Fold the rear axle housing and glue the axle liner inside it. Push straw bushings into the axle holes and slide the rear axle through.
2. Fold the engine frame and front weights and glue them in a line ahead of the housing. Fold the front axle beam, slide the front axle through it and pin it to the weights so it rocks.
3. Press the four wheels onto the axles. Fold the bonnet and glue it on the frame.
4. Fold the cab (sides up, wrap the strip round, glue the tabs) and glue it on the housing. Curl the two mudguards over the back wheels and glue their inner sides to the cab.
5. Glue the drawbar under the housing, then pin the two lower links on with the linkage pin. Drop the hitch pin in to couple a trailer.
