Combination Safe Money Box

Print it

1. Print every page at 100% / "Actual size" (no "fit to page"). 32 pages on A4.
2. Check the 50 mm square measures exactly 50 mm.
3. Tape the pages together using the corner marks (page order is printed on each page).

Build it

1. Fold the shell: back and sides up, glue the back's tabs inside the sides, then fold the hems over the top edges and glue them down.
2. Fold the front frame double and glue it inside the front, foot on the floor: its right edge is the jamb the bolt locks behind.
3. Fold the three dials, three gate wheels, the bolt and the knob: each is a small drum or bar, so glue its strip round one side, then close the other side over it.
4. Glue a straw bushing in each door hole. Push a spindle through each, glue a dial on the front and a hub on the back, and pin a gate wheel to its hub with a split pin: the hole you choose sets your code, notch at the top.
5. Glue the two bolt guides behind the door above the gates and slide the bolt in, teeth down. Push the handle stem through the slot into the bolt and glue the knob on. Glue the band peg in, and hook the rubber band from the peg to the bolt so it springs right (locked).
6. Glue the door's hinge leaf under the floor, fold the door up over its score and tape the hinge. Glue the lid cap on (doubled coin slot), slide the coin drawer in, set the dials and lock it.
