bhoksi

Durban Airport Playset

Print it

1. Print every page at 100% / "Actual size" (no "fit to page"). 30 pages on A3.
2. Check the 50 mm square measures exactly 50 mm.
3. Tape the pages together using the corner marks (page order is printed on each page).

Build it

1. Fold the runway, the sea-and-beach strip and the taxiway link, and line them up.
2. Fold the terminal, glue the two bulkheads inside it and close the roof. Glue the rolling roof on at every dip, then the departures road along the back.
3. Fold the pier but leave its roof open. Fold the four airbridges, push a split pin down through each tongue and the pier roof, open the legs underneath, then glue the roof shut. Swing the bridges out to the plane.
4. Build the tower: base, shaft, the four gussets at its foot, the cab floor, then the glass cab with its roof. Fold the cargo shed and lift its door.
5. Build the plane: push the two straws through the axle holes, glue a wheel on each end, slide the wings and tailplane through their slots and glue the fin on top.
6. Fold the cane fields and pleat the cane rows onto them, stand the travellers up and line up the link with your other airport!
