My First Postbox

Print it

1. Print every page at 100% / "Actual size" (no "fit to page"). 12 pages on A3.
2. Check the 50 mm square measures exactly 50 mm.
3. Tape the pages together using the corner marks (page order is printed on each page).

Build it

1. Fold the postbox: Fold the walls up round the base, glue the tabs under the floor and close the seam.
2. Fold the hems: Fold the hems over inside and glue them down. The deep front hem lines up with the slot and makes it double thick.
3. Fit the collar: Fold the collar's four tabs up, push it down inside to halfway and glue the tabs to the walls. It keeps the tall box square.
4. Fold the cap: Fold the cap and its hems the same way. Fold the yellow flap in half and glue the layers together: it hangs over the slot. Don't glue the cap to the box.
5. Fold the letters: Fold each letter in half along its crease and glue it flat. That's eight letters, numbered 1 to 8.
6. Post the letters!: Lift the flap and post the letters one by one, counting them in. Lift the cap off to tip them out again.
