bhoksi

Minibus Taxi

Print it

1. Print every page at 100% / "Actual size" (no "fit to page"). 14 pages on A4.
2. Check the 50 mm square measures exactly 50 mm.
3. Tape the pages together using the corner marks (page order is printed on each page).

Build it

1. Press out the body, chassis, bulkhead, roof rack and mirrors. Crease every fold.
2. Fold the chassis box and glue its corner tabs. Push a straw through each pair of axle holes, glue it in and trim it flush.
3. Slide the dowel axles through the straws and press a wooden wheel on each end. Spin them: they should turn freely.
4. Fold up the body sides, then glue the bulkhead's foot to the floor behind the sliding door and its tabs to both sides.
5. Wrap the grille, bonnet and windscreen round and glue their tabs, then fold the rear doors up and close the roof over.
6. Crease the tailgate so it lifts at the top, then glue the body on the chassis.
7. Glue the mirrors on beside the windscreen and the roof rack on the roof. Sharp sharp!
