Push-Along Elephant

Print it

1. Print every page at 100% / "Actual size" (no "fit to page"). 8 pages on A3.
2. Check the 50 mm square measures exactly 50 mm.
3. Tape the pages together using the corner marks (page order is printed on each page).

Build it

1. Axle plates: Fold the four axle plates down off the long sides of the belly tray. Fold each one double and glue it: the holes line up.
2. Wheels: Push an axle through one plate, slide on two wheels, then push it through the plate opposite. Glue each wheel to the axle with a dot of glue, close to its plate.
3. Body: Lay the body printed side down and fold the four leg walls up off the back. Glue the corner tabs inside.
4. Fit the wheels: Drop the belly tray into the body so the wheels sit inside the legs. Glue the plates to the legs and the flanges to the walls. The legs cover the axle ends, so the wheels can't come off.
5. Head and ears: Fold the head box and close its lid. Fold each pink ear out and glue its grey back onto it: that closes the corner of the head.
6. Trunk: Fold the trunk round its shape and glue the tabs. Glue its top under the front of the head, then glue the back of the head to the front of the body.
7. Handle: Fold the handle in half, glue the two layers together and glue its foot along the middle of the back.
