bhoksi

Tabletop Soccer

Print it

1. Print every page at 100% / "Actual size" (no "fit to page"). 58 pages on A4.
2. Check the 50 mm square measures exactly 50 mm.
3. Tape the pages together using the corner marks (page order is printed on each page).

Build it

1. Fold the pitch deck (skirts down, tabs glued). Fold both side rails: walls round, four card bulkheads glued inside, glue strip down, end caps closed with their flaps.
2. Fold the two end walls the same way (two bulkheads each). Glue the rails along the deck's long sides, then the end walls across the ends, goal mouths level with the pitch.
3. Push a straw right through each pair of rod holes in both rails and glue it in. Fold the eight players and four handles: each is a small box or tube with the rod hole through its sides.
4. Push each rod through the near rail, thread its players on, then through the far rail. Glue the players square and upright, wind a rubber band tight on the rod just inside each rail so it slides about 45 mm, and glue the handle on.
5. Glue the goal boxes behind the goal mouths, pin the score dials on and kick off.
