Stacking & Nesting Boxes

Print it

1. Print every page at 100% / "Actual size" (no "fit to page"). 8 pages on A3.
2. Check the 50 mm square measures exactly 50 mm.
3. Tape the pages together using the corner marks (page order is printed on each page).

Build it

1. Fold the boxes: Fold each box's walls up round its base and glue the tabs under the floor.
2. Fold the rims: Fold every rim over inside and glue it down, so each edge is smooth.
3. Check the fit: Nest the boxes, 5 inside 4 inside 3, all the way into box 1. If one sticks, squeeze its corners gently.
4. Build a tower: Turn the boxes over and stack them, 1 at the bottom to 5 on top. Count them out loud, then knock it down!
