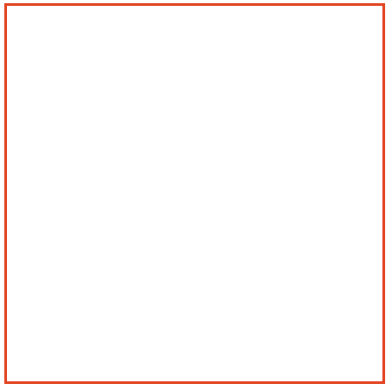
bhoksi

Moses Mabhida Stadium 3D Puzzle

Print it

1. Print every page at 100% / "Actual size" (no "fit to page"). 16 pages on A4.
2. Check the 50 mm square measures exactly 50 mm.
3. Tape the pages together using the corner marks (page order is printed on each page).



Build it

1. Fold the plinth and glue its corner tabs: the pitch and the paving are printed on top.
2. Fold the two halves of the blue seating bowl, glue their end tabs together and glue the floor tabs down round the pitch.
3. Do the same with the two halves of the outer wall, round the seats, then fold the white roof in over the stands.
4. Fold the arch and its two south legs into square tubes. Glue the arch's foot pad on the north footing, then the legs on theirs so they meet under the end of the arch.
5. Tie the string stays from the arch down to the roof edge. Thread the SkyCar's haul line over the crown and pull it up to the top.
