bhoksi

Table Mountain 3D Puzzle

Print it

1. Print every page at 100% / "Actual size" (no "fit to page"). 6 pages on A3.
2. Check the 50 mm square measures exactly 50 mm.
3. Tape the pages together using the corner marks (page order is printed on each page).

Build it

1. Press out the base and the five layers. Crease every fold.
2. Fold the base into a box, glue its tabs and tuck the lid in: the five slots sit on top.
3. Fold each layer in half along its foot and glue the two sides back to back. Press flat while the glue grabs.
4. Slot the layers in: push each one down through its slot until its foot stands on the floor of the base, Table Mountain at the back, then the buttresses, Lion's Head and the slopes, the city at the front.
5. A dab of glue where each layer meets the lid locks it. Look at it from the front, like the view from Bloubergstrand.
